

# DecisionEdge Designer Training

## Learn to Create Custom Reports for Specific Requirements

While DecisionEdge consultants can create single custom charts and reports, organizations with an ongoing need for custom reports will want to train their own onsite designers. Sending technical experts to DecisionEdge classroom training is how organizations develop the onsite expertise required to quickly and efficiently create new project charts and reports.

Led by a DecisionEdge expert, each day of classroom training provides students with the training they need to create custom charts with DecisionEdge Designer.

### Course Outline:

**Day 1: Morning** - Training on DecisionEdge Suite features and functionality

**Day 1: Afternoon** - Training on DecisionEdge Designer for charts

**Day 2: Morning** - Training on DecisionEdge Designer for simple reports

**Day 2: Afternoon** - Training on DecisionEdge Designer for complex reports

**Day 3:** Training on custom charts and reports for client

### About DecisionEdge Designer

#### Resource Head Count

DecisionEdge Designer gives developers the ability to create new interactive charts and reports from business applications such as Primavera and Microsoft Office Project. Choose the appropriate chart type for the requirements, map data from multiple fields and tables, use custom calculations to create chart and report elements, and select the fonts, colors, and overall layout that make it all look just right. By sharing with other DecisionEdge users, all stakeholders will have the insight they need for better business decisions.

### About DecisionEdge

DecisionEdge, Inc. is a leading provider of business intelligence software designed specifically for project managers. By adding DecisionEdge reporting and graphics software to existing project management applications such as Primavera and Microsoft Office Project, managers will have an enhanced ability to understand and communicate important business trends and all stakeholders will have the clear information they need for better results. From managers using embedded graphics in project management applications to stakeholders viewing live, interactive graphics and reports through a portal, DecisionEdge helps everyone make better business decisions.
