

# DecisionEdge Earned Value Manager Training

DecisionEdge Earned Value Manager is designed for students who want to know the day to day operations of this application. At the end of this course, students will understand and know how to build the Rate, Organization, and Project Structure. This two day course will teach students how to import a baseline, actual cost, performance values, and also teach students how to update the Estimate to Complete (ETC). Finally, the class will learn how to extract data they need by using the reports, charts, and the Online Analytical Processor (OLAP) cube.

**Student Qualifications:** Students must have a basic understanding of earned value.

## Course Outline

- Day 1: Morning** Basic Navigation, Building an Organizational Breakdown Structure and Defining Calendars
- Day 1: Afternoon** Configuring the Rate Structure
- Day 2: Morning** Building the Enterprise Project Structure, Building a Baseline and Importing Actual Cost
- Day 2: Afternoon** Importing Performance and Forecasts. Learning the Reports, Charts and OLAP

## About DecisionEdge Earned Value Manager

DecisionEdge Earned Value Manager is an application that integrates project information from Microsoft Project or Project Server with actual cost from your company's accounting system. Whether you are looking for a system to comply with the EIA-ANSI Government standard or use this tool as a best business practice in your organization, DecisionEdge Earned Value Manager

will help you answer the question – How much progress did we make for the money we spent?

The screenshot displays the DecisionEdge Earned Value Manager application window. The main area shows a hierarchical tree view of projects and tasks. The right-hand pane displays a summary table for the 2007 period.

2007 Period 10	
Cost	1,102,073.44
Cost	0.00
