

FOR IMMEDIATE RELEASE

Integrated Management Concepts and Ten Six Consulting Partner to Deliver CloudEVM Software and Earned Value Management Services

IMC's DecisionEdge CloudEVM and the expertise Ten Six brings in Earned Value Management Services will help companies across industries gain better visibility and control.

THOUSAND OAKS, Calif. (August 24, 2015) – Integrated Management Concepts (IMC), the premier cloud-based provider and consulting firm with Earned Value Management Systems (EVMS) expertise, today announced a strategic partnership with Ten Six Consulting to provide comprehensive Earned Value Management Services (EVMS) and ANSI-748 compliance across a wide range of industries including government, technology, aerospace and defense, oil and gas, engineering and construction, utilities, and media.

The two companies will be hosting a webinar called, “Introducing Earned Value Management and CloudEVM” on September 22, 2015 at 11:00 AM Pacific Time for companies interested in learning more about EVMS. To register, visit <https://attendee.gotowebinar.com/register/6116414229150860545>.

“Ten Six brings extensive experience in implementing EVMS to deliver individualized solutions that help customers with contract compliance, as well as improved accountability, reduction in project risk and improved project delivery,” said Mark Tillema, President and CEO of Integrated Management Concepts. “This partnership provides a cost-effective, cloud-based solution where CloudEVM can be used on enterprise engagements in conjunction with Ten Six’s overall EVMS implementation strategy.”

Ten Six will offer CloudEVM through a Software as a Services (SaaS) model, where customers’ analysts and control account managers have access to dashboards and variance analysis functionality while IMC’s Virtual EVMExperts operate CloudEVM. This eliminates the need for small to medium-size businesses to install and maintain hardware and software on-site while providing them with a streamlined, intuitive solution that simplifies compliance, and provides in-depth analytics that serve as accurate and reliable predictors of project success. In addition, Ten Six will offer services around the total EVMS process ensuring its customers contract compliance.

“After thoroughly reviewing IMC’s solutions, we are confident that working collaboratively we can deliver our customers the most powerful web based solution available in the industry,” said Jon Swain, President of Ten Six. “We look forward to a long and mutually beneficial partnership.”

About Integrated Management Concepts

IMC was founded in 1995 by veteran leaders who are passionate about achieving successful project management utilizing earned value. Their continuing goal is to take a 360 degree view of earned value management, assuring that their software serves the project manager, portfolio manager, executive management and their customers. Starting in 2009, the company dedicated its development team to providing a next generation of earned value applications. Now, IMC is leading the way with CloudEVM, the software application specifically designed to support earned value management.

About Ten Six Consulting

Ten Six Consulting specializes in implementing Enterprise Project Management (EPM), Project Portfolio Management (PPM) and Earned Value Management (EVM) solutions in industries as diverse as technology, aerospace and defense, oil & gas, engineering & construction, utilities, government and media. The company works with both private and public sector organizations to help them improve their Project and Portfolio Management and Earned Value Management capabilities.
